

Service Manual

Amplifier

Amplifier

System: SC-HD60

SE-HD60

Colour

(N) Gold

Area

(E) Europe.

(EG) Germany and Italy.

Because of unique interconnecting cables, when a compact requires service, send or bring in the entire system.

Specifications

Amplifier Section

Power output

DIN 1 kHz, THD 1 %, both channel driven: 2×45 W (6 ohm)RMS 1 kHz, THD 10 %, both channel driven: 2×60 W (6 ohm)

Total harmonic distortion

Rated power at 1 kHz: 1 % (6 ohm)

Half power at 1 kHz: 0.09 % (6 ohm)

Load impedance: 6 ohm

S/N (rated power): 90 dB

General

Power consumption: 100 W

Power supply

[for (E,EG) area]: 230 V, AC 50Hz

Dimensions: 196(W)/103(H)/255(D) mm

Weight: 4.1 kg

Notes:

1. Specifications are subject to change without notice.
2. Weight and dimensions are approximate.
3. Total harmonic distortion is measured by the digital spectrum analyzer.

System/SC-HD60:

Tuner: ST-HD60, Compact Disc Player: SL-HD60, Amplifier: SE-HD60, Cassette Deck: RS-HD70, Speakers: SB-HD70

Notes: * Made in PAES

⚠ WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

■ Accessories

- AC power supply cord 1 pc.
(RJA0019-2K)
- Remote control transmitter 1 pc.
(RAK-CH193WH)
- Speaker cords 2 pcs.
(RFA0737-R)

- Remote control batteries 2 pcs.
(UM-4, "AAA", R03)
Note: These are available on sales route.
- AM loop antenna set (RSA0021)
AM loop antenna 1 pc.
Antenna holder with stand 1 pc.
- Antenna holder without stand 1 pc.
Screw 1 pc.

- FM indoor antenna 1 pc.
(RSA0007)
- Flat cable (short) 1 pc.
(REX0608)
- Flat cable (Long thick) 1 pc.
(REX0812)

- Flat cable (Long thin) 1 pc.
(REX0813)

■ Before Repair

- (1) Turn off the power supply. Using a 10 Ω , 10 W resistor, connect both ends of power supply capacitors (C715 ~ C718) in order to discharge the voltage.
- (2) Before turning the power supply on, after completion of repair, slowly apply the primary voltage by using a power supply voltage controller to make sure that the consumed current at 50 Hz in NO SIGNAL mode should be shown below with respect to supply voltage 230 V.

Area	(E) (EG)
Power supply voltage	AC 230 V
Consumed current 50 Hz	60 ~ 180 mA

■ Protection Circuitry

The protection circuitry may have operated if either of the following conditions is noticed:

- * No sound is heard when the power is switched ON.
- * Sound stops during a performance.

The functions of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are "shorted", or if speaker systems with an impedance less than the indicated rated impedance of this unit are used.

If this occurs, follow the procedure outlined below:

1. Switch OFF the power.
2. Determine the cause of the problem and correct it.
3. Switch ON the power once again.

Note:

When the protection circuitry functions, the unit will not operate unless the power is first switched OFF and then ON again.

■ Location of Controls

① **Power "STANDBY ϕ /ON" switch (POWER, STANDBY ϕ /ON)**

Press to switch the unit from on to standby mode or vice versa. In standby mode, the unit is still consuming a small amount of power.

② **Standby indicator (STANDBY)**

When the unit is connected to the AC mains supply, this indicator lights up in standby mode and goes out when the unit is turned on.

③ **Volume control (VOLUME)**

④ **Source direct button (SOURCE DIRECT)**

⑤ **Vocal presence button (VOCAL PRESENCE)**

⑥ **Headphones jack (PHONES)**

⑦ **Balance control (BALANCE)**

⑧ **Bass control (BASS)**

⑨ **Treble control (TREBLE)**

■ Installation

Locating the components

Side-by-side set-up **A**

- Ⓐ CD player
- Ⓑ Tuner
- Ⓒ Cassette deck
- Ⓓ Amplifier
- Ⓔ Left speaker
- Ⓕ Right speaker

Stacking **B**

- Ⓐ CD player
- Ⓑ Tuner
- Ⓒ Cassette deck
- Ⓓ Amplifier

Caution:

Use the speakers only with the recommended system. Failure to do so may lead to the amplifier and/or the speakers, and may result in the risk of fire. Consult a qualified service person if damage has occurred or if you experience a sudden in performance.

Note

Left and right speakers are exactly the same.

■ Connections

Connect the AC mains lead after you have connected all other cables.

To prepare the AM loop antenna wire and speaker cords, twist the vinyl cover tip and pull off.

1 Connect the flat cables.

1. Connect the short flat cable between the terminals A1 and A2.
2. Connect the long thick flat cable between the terminals B1 and B2.
3. Connect the long thin flat cable between the terminals C1 and C2.

Note

Do not try connecting or disconnecting the flat cables while the power is switched to ON.

After connection:

Keep cables as flat against the back of the unit as possible.

2 Connect the FM indoor antenna.

Tape the antenna to a wall or column, in a position where radio signals are received with the least amount of interference.

Note

When you cannot get a good reception with this FM indoor antenna, we recommend you install an FM outdoor antenna (not included).

3 Connect the AM loop antenna.

You can also install the AM loop antenna on the rear of the cassette deck, wall or pillars.

In this case, be sure to use the antenna holder with the hole.

•To install on the cassette deck rear (A)

•To install on walls or pillars

**Note**

To minimize noise pickup, bundle the loop antenna cord using a tape or so to keep the flat cables away from the AM loop antenna cord.

4 Connect the right (R) and left (L) front speaker cables.**Note**

- For SC-HD60 connect the end of the speaker cable with the cylindrical sleeve to the amp side.
- To prevent damage to circuitry, never short-circuit positive (+) and negative (-) speaker wires.
- Be sure to connect only positive (red) wires to positive (+) terminals and negative (black) wires to negative (-) terminals.

These speakers are made so as to be able to be used in close proximity to the TV, but irregular coloring may result due to how the system is placed. If such distortion occurs, turn off the TV for sometime between 15 and 30 minutes. The demagnetizing function of the TV will eliminate the distortion. If the irregular coloring is still visible, then move the speaker further away from the TV. Please note that if there is a magnetic object near the TV, irregular coloring may result due to the interaction between the TV and the speakers.

5 Connect the AC mains lead.**(United Kingdom only)**

BE SURE TO READ THE CAUTION FOR AC MAINS LEAD ON PAGE 4 BEFORE PROCEEDING TO STEP 5.

Insertion of Connector

Even when the connector is perfectly inserted, depending on the type of inlet used, the front part of the connector may jut out as shown in the drawing.

However there is no problem using the unit.

Appliance inlet

**Connections to "DIGITAL OPTICAL OUT" terminal: (B)**

Before using this terminal, take out the dust protection cap.

Connect an optical-fiber cable to the optical input terminal of the DCC or minidisc deck (cables and components not included).

■ Changing the Tone

Listening with Vocal Presence **A**

Press VOCAL PRESENCE.

The button will light up. Vocal Presence accentuates midrange sounds to make voices stand out. (Vocal Presence cannot be used at the same time as SOURCE DIRECT.)

To cancel

Press VOCAL PRESENCE again.

For clearer sound **B**

Press SOURCE DIRECT.

The button will light up. Voice signals will not be fed through the tone control circuit, so you get a clearer sound. (You cannot adjust BASS or TREBLE when using SOURCE DIRECT.)

To cancel

Press SOURCE DIRECT again.

To adjust the sound balance **C**

Turn BALANCE to adjust the left/right sound balance.

Note

The effect works only with playback. It cannot be used in recording.

To adjust the tone quality **D**

Turn BASS to adjust the low-frequency sound.

Turn TREBLE to adjust the high-frequency sound.

Note

The effect works only with playback. It cannot be used in recording.

■ Convenient Functions

To mute the volume **E**

This feature is convenient when you have a telephone call, etc.

by remote control only

Press MUTING.

"MUTING" will light.

To cancel, press MUTING once again. ("MUTING" goes out.)

To cancel from the amplifier, reduce the volume level to the minimum position (--- dB) and then reset to the desired volume.

For your reference:

When the system is turned off, the muting operation will be automatically canceled.

■ Operation Checks and Main Component Replacement Procedures

NOTE

1. This section describes procedures for checking the operation of the major printed circuit boards and replacing the main components.
2. For reassembly after operation checks or replacement, reverse the respective procedures. Special reassembly procedures are described only when required.
3. Select items from the following Index when checks or replacement are required.
4. Refer the parts No. on the page of "Main Component Replacement Procedures", if necessary.

● Contents

	Page.
•Checking Procedures for each P.C.B.	
1. Checking for the operation P.C.B..	8.
2. Checking for the PDM P.C.B..	9.
•Main Component Replacement Procedures	
1. Replacement for the regulator transistor.	10.

■ Checking Procedure for each P.C.B.

1. Checking for the operation P.C.B.

Step 4

Remove the cabinet.

Step 3

b

Step 6

Pull out the front panel ass'y.

c × 2

Step 5

c

• Check the operation P.C.B. as shown below.

Operation P.C.B. (Solder side)

2. Checking for the PDM P.C.B.

• Follow Step 1 ~ Step 6 in item 1 on pages 8 and 9.

Step 1

a × 4

• Check the PDM P.C.B. as shown below.

PMD P.C.B.

Step 5

e × 8

Step 7

Remove the PDM P.C.B..

b

d × 2

Step 6

Step 4
Unsolder and remove the PDM ground plate.

b × 2

Step 2

c × 8

Step 3

Main Component Replacement Procedures

1. Replacement for the regulator transistor

- Follow **Step 1** ~ **Step 6** in item 1 on page 8 and 9.
- Follow **Step 1** ~ **Step 7** in item 2 on page 9.

NOTE

When mounting the regulator transistor, apply silicone compound (RFKX0002) to the rear side of regulator transistor.

Wiring Connection Diagram

■ To Supply Power Source

This unit SE-HD60 is not operate normally without connecting the unit ST-HD60.

When operate the unit SE-HD60, be sure to connect the unit ST-HD60 with included connection cable.

1. Connect the tuner **ST-HD60** to this unit **SE-HD60**.
2. Connect the AC power supply cord.
3. Connect the speakers to speaker input terminal.
4. Press the power switch.

- **S802** : Source direct switch (SOURCE DIRECT)
- **S803** : Vocal presence switch (VOCAL PRESENCE)

- Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard. Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.
No mark: Power ON

- Important safety notice:
Components identified by Δ mark have special characteristics important for safety.
Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

- **Caution!**
IC and LSI are sensitive to static electricity.
Secondary trouble can be prevented by taking care during repair.
Cover the parts boxes made of plastics with aluminum foil.
Ground the soldering iron.
Put a conductive mat on the work table.
Do not touch the legs of IC or LSI with the fingers directly.
